

Doc. No. : LITD 17 (12707)

ISO/IEC 27050-1:2017

**BUREAU OF INDIAN STANDARDS
DRAFT FOR COMMENTS ONLY**

Draft Indian Standard

**INFORMATION TECHNOLOGY — SECURITY TECHNIQUES —
ELECTRONIC DISCOVERY
PART 1: OVERVIEW AND CONCEPTS**

ICS 35.040

Last date for receipt of comments is: 13 August 2018

Information Systems Security and Biometrics Sectional Committee, LITD 17

NATIONAL FOREWORD

(Formal clauses to be added later)

This Draft Indian Standard (Part 1) which is identical with ISO/IEC 27050-1:2016 'Information technology – Security techniques – Overview and Concepts' International Organization for Standardization (ISO) and International Electrotechnical Commission (IEC) will be adopted by the Bureau of Indian Standards on the recommendations of the Information Systems Security and Biometrics Sectional Committee, and approval of the Electronics and Information Technology Division Council.

Other parts in this series are:

Part 3 Code of Practice for Electronic Discovery

The text of ISO/IEC Standard may be approved as suitable for publication as an Indian Standard without deviations. Certain conventions are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- a) Wherever the words 'International Standard' appear referring to this standard, they should be read as 'Indian Standard'.
- b) Comma (,) has been used as a decimal marker while in Indian Standards, the current practice is to use a point (.) as the decimal marker.

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test or analysis, shall be rounded off in accordance with IS 2 : 1960 'Rules for rounding off numerical values

(revised)'. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

Scope of ISO/IEC 27050-1:2016 is as follows:

“Electronic discovery is the process of discovering pertinent Electronically Stored Information (ESI) or data by one or more parties involved in an investigation or litigation, or similar proceeding. This document provides an overview of electronic discovery. In addition, it defines related terms and describes the concepts, including, but not limited to, identification, preservation, collection, processing, review, analysis, and production of ESI. This document also identifies other relevant standards (e.g. ISO/IEC 27037) and how they relate to, and interact with, electronic discovery activities.

This document is relevant to both non-technical and technical personnel involved in some or all of the electronic discovery activities, and it is not intended to contradict or supersede local jurisdictional laws and regulations, so exercise care to ensure compliance with the prevailing jurisdictional requirements.”

Note: The Technical content of this document has not been enclosed as these are identical with the corresponding ISO/IEC Standard. For details please refer ISO/IEC 27050-1:2016 or kindly contact.
