NATIONAL FOREWORD

This Indian Standard which is identical with ISO 13567-3: 1999 ‘Technical product documentation – Organization and naming of layers for CAD – Part 3: Application of ISO 13567-1 and ISO 13567-2’ issued by the International Organization for Standardization (ISO) will be considered for adoption by the Bureau of Indian Standards on the recommendation of the Drawings Sectional Committee and approval of the Production and General Engineering Division Council.

IS 13567 will consist of three parts under the general title ‘Technical product documentation – Organization and naming of layers for CAD’. The other two parts are as under:

Part 1 Overview and principles

Part 2 Concepts, format and codes used in construction documentation

The text of ISO Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain terminology and conventions are, however, not identical to those used in Indian Standards; attention is particularly drawn to the following:

- a) Wherever the words ‘International Standard’ appear, referring to this standard, they should be read as ‘Indian Standard’.
- b) Comma (,) has been used as a decimal marker while in Indian Standards the current practice is to use a point (.) as the decimal marker.

In this adopted standard, reference appears to certain International Standards for which Indian Standards also exist. The corresponding Indian Standards, which are to be substituted in their place, are listed below along with their degree of equivalence for the editions indicated:

International Standards	Corresponding Indian Standards	Degree of Equivalence
ISO 13567-1: 1998 Technical product documentation– Organization and naming of layers for CAD – Part 1 Overview and principles	IS /ISO 13567-1: 1998 Technical product documentation– Organization and naming of layers for CAD – Part 1 Overview and principles	Identical
ISO 13567-2: 1998 Technical product documentation – Organization and naming of layers for CAD – Part 2 Concepts, format and codes used in construction documentation	IS /ISO 13567-2: 1998 Technical product documentation – Organization and naming of layers for CAD – Part 2 Concepts, format and codes used in construction documentation	Identical
