

NATIONAL INSTITUTE OF TRAINING FOR STANDARDIZATION

TRAINING PROGRAMMES ON STANDARDIZATION

Standardization is the process of developing and implementing technical standards. Standardization can help to maximize compatibility, interoperability, safety, repeatability, or quality.

Standards play an important role in facilitating trade and commerce within and between all countries of the world. They advance the national economy, benefit the health, safety and welfare of the public, and assist and protect consumers. These standards are developed by many bodies, at the sub-national, national, regional and international levels, usually by consensus processes.

Bureau of Indian Standards (BIS), the national standards body of India, is involved in standard formulation activity and have well defined rules and procedures for developing standards. It also complies with the WTO Good Practices on standard formulation and adoption.

In order to create awareness amongst various stakeholders on the aims, objectives, benefits principles and the process of standards development and to the significance of participation in standardization process, NITS conducts a number of training programmes on standardization.

Following are the training programmes organized by NITS on Standardization:

Training Programme for Standards Developing Organizations

The term Standards Developing Organization (SDO) generally refers to the industry- or sector-based standards organizations that develop and publish industry specific standards. These organizations develop standards for a specific sector application.

This five day training programme is provided to various SDOs with an aim to enable them to:

1. Understand the concepts of standardization.
2. Understand the need for having a single standard nationally.
3. Harmonize the standard making procedures of various SDOs.
4. Provide guidance on writing standards in a uniform manner, thereby facilitating their adoption / recognition if necessary, as Indian Standard.
5. Develop better understanding of the need to participate in national/international standardization process.

Training for Technical Committee Members

For formulation of Indian Standards, BIS functions through the Technical Committee structure. The committee structure of BIS seeks to bring together all those with substantial interest in particular project, so that standards are developed keeping in view national interests and after taking into account all significant view points through a process of consultation.

The basic aim of this two day training programme is to provide training to members of Technical Committees to enable them perform their roles and responsibilities in standards development. Through this training the experts participating in Technical Committees are expected to develop understanding of how the standards development process work and how standards are to be drafted and are especially useful for those participating in standardization work in the technical committees at national and international level.

Workshops on Specific Standard(s)

It has been the constant endeavor of BIS to develop of standards based on wide consultation and involvement of all stakeholders concerned and in the effective implementation of standards.

These workshops are organized as an effective means of disseminating information and facilitate implementation of standards or for developing standards /opinion building on standards. These are intended to cover subjects that are critically important such as on health, safety and environment.

TRAINING FEES

The charges for one day programme is Rs 5000/- per person plus service tax.

Note: The payment is to be made in advance through NEFT (bank details as given below) in the Savings Account no 712210100000650 Bank of India Sector 62 Noida , Branch code 7122 IFS code BKID0007122 or in form of demand draft in favour of Bureau of Indian Standards payable at New Delhi.
